

Name: Fahmida Ahmed Zuma.

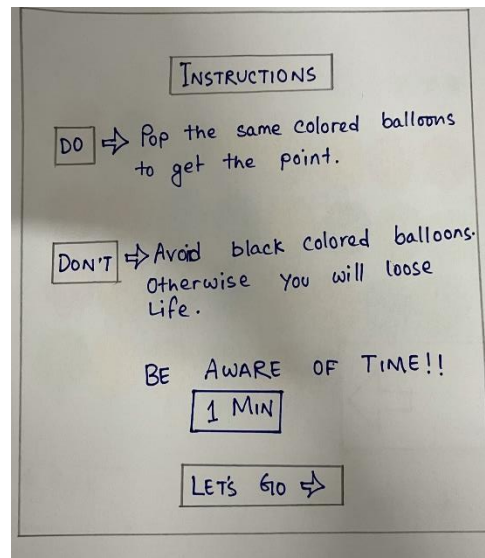

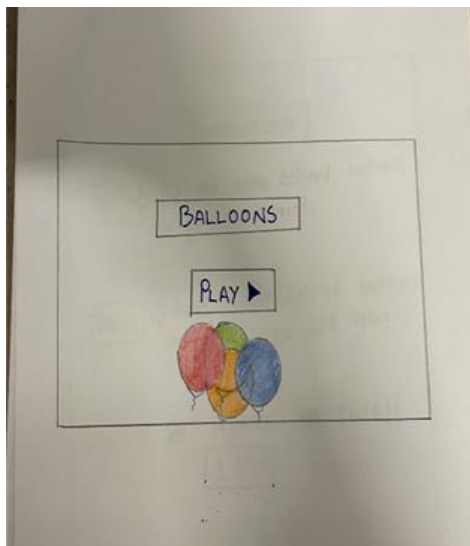

Game Name: Balloons Pop.

Textual description of my game:

I have made a very easy and simple playing game. It's a fun game for babies to adult.

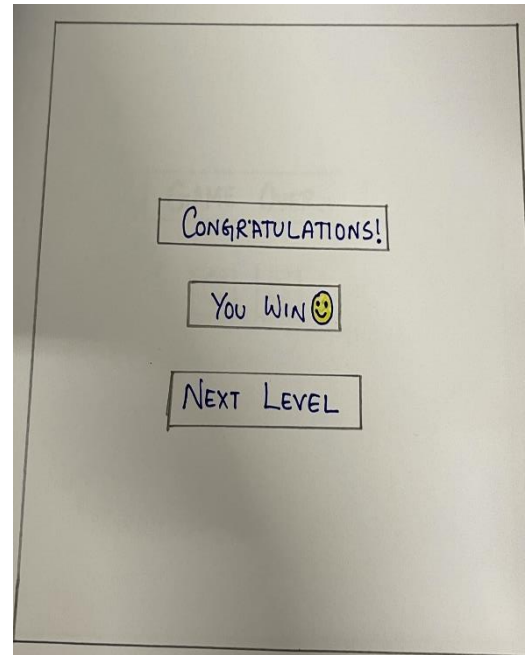

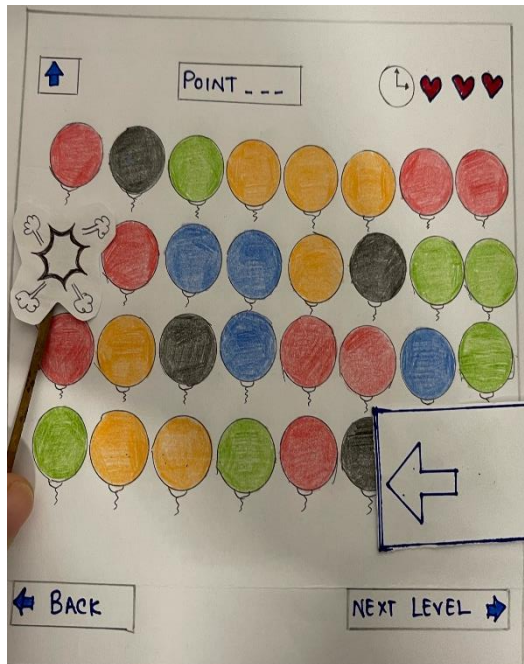

How to begin?

1. The home screen will show us the play button only. So, everyone can guess. where to click first. And then all you have to just press the play button and it will take you to the instruction screen.

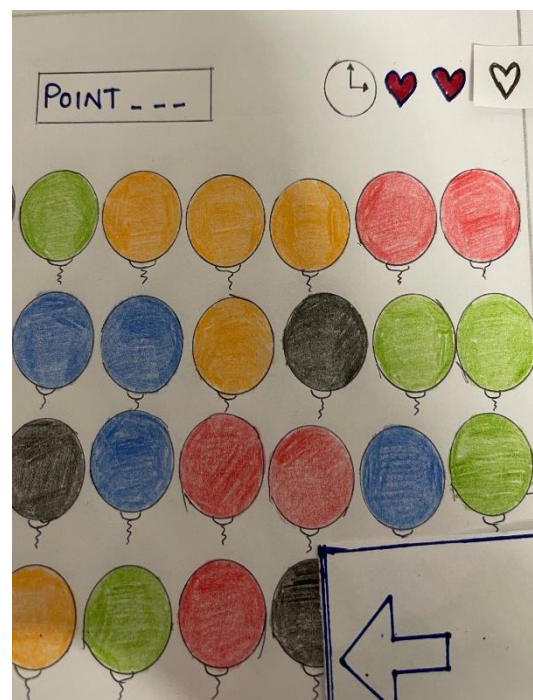

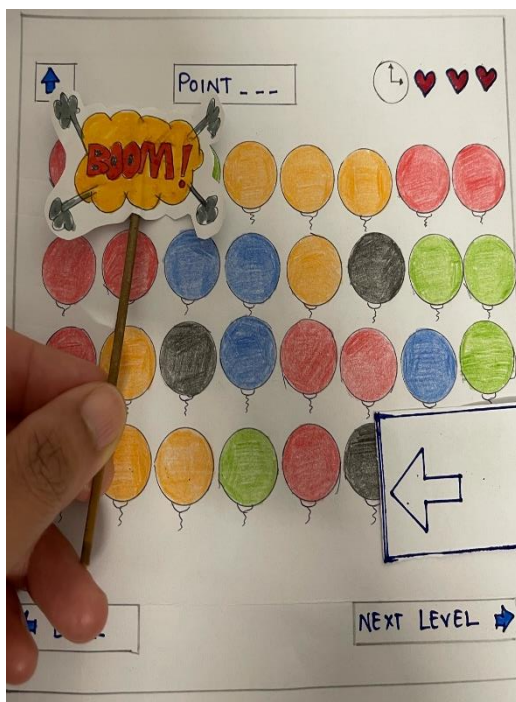

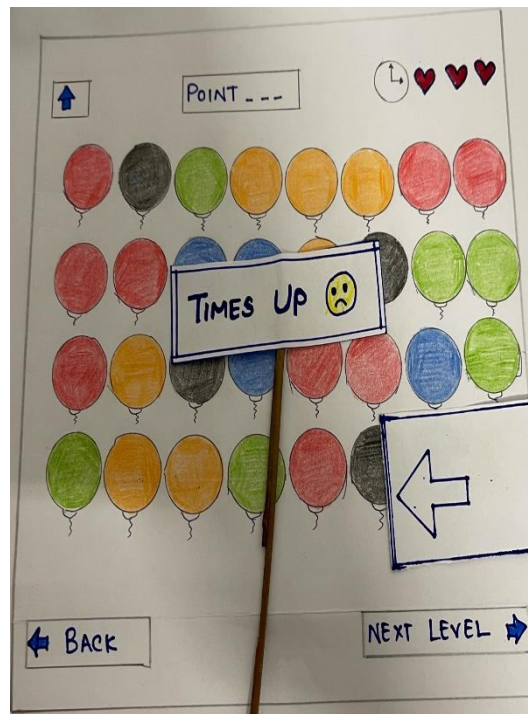

2. Then by pressing the "Let's go" button we can start playing the game. From the arrow sign the different colored balloons keep coming to upwards. And the balloons are limited. All you have to do is just pop the same-colored balloons in order to get the point. By popping the right balloons comes there an animation of popping and

gives you 1 point for each. So, you must pop all the balloons in 1 minute to win the game and to go to the next level.

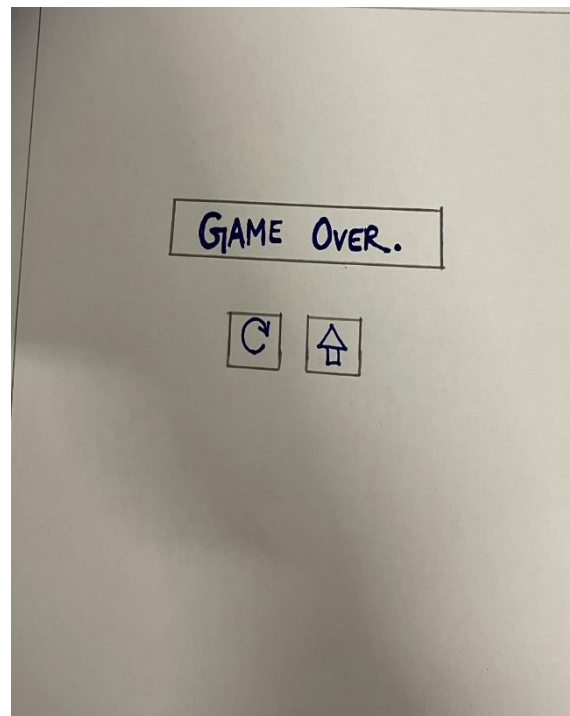

3. There are two ways to lose the game. By popping the wrong balloons (black) and by taking too much time to pop all the balloons. By popping the black balloons there comes an animation of "BOOM!" and you will lose 1 life. You have only 3 lives. And another way you can lose the game only if you are slow to pop the balloons as the balloons comes fast.

4. And then you will be notified that your game is over and whether you can replay the game or you can go to the home screen.
